What were some challenges you faced while making this app?
The most challenging part was implementing JavaScript logic, which took me a lot of time.

Given more time, what additional features, functional or design changes would you make?
I would like to add a feature that allows users to follow each other.

What assumptions did you make while working on this assignment?
I assumed that users would primarily interact with the app through a web browser and that basic authentication and post management would be the core functionalities.

How long did this assignment take to complete?
5days.
